Inspiratron is a research and development company mainly focusing on text mining, data analytics, machine learning modeling, and cybersecurity. Our mission is to empower people by providing machine intelligence, secure and powerful solution to everyday problems. We are working across the industry and have experience in financial, retail, health-care and political sectors. We offer consulting and in some cases the development and integration of innovative and intelligent solutions.

We offer consulting services in three main areas:

- Natural language processing - development of solutions that can handle human language. [Read more here.](#)
- Machine learning - solutions that can learn from the data. [Read more here.](#)
- Cyber-security - making sure your solutions are safe and secure. [Read more here](#)

The consulting is performed by experts that usually have a Ph.D. degree in the relevant area and extensive academic and industry experience.
